Address: Amman-Jordan-Tabarbour
Date of birth:4/9/2003

Skills:
Working under pressure
Problem solving
Quick-witted

PROFESSIONAL EXPERIENCE

I am proficient in various technologies and programming languages, including:

Web Development

- * React.js: Building interactive and robust user interfaces.
- * Node.js with Express.js: Developing efficient and scalable backend applications.
- * CSS Frameworks:
 - * Tailwind CSS: For rapid and flexible UI design.
 - * Bootstrap: For developing responsive and attractive user interfaces.

Databases

- * MongoDB: Flexible and scalable NoSQL databases.
- * SQL: For managing relational databases.

Mobile Application Development

- * Flutter: Building cross-platform applications (iOS and Android) with beautiful UIs and high performance.

Microsoft Technologies

- * ASP.NET MVC: For developing powerful web applications.
- * ASP.NET Web API: For building RESTful web services.

Programming Languages

- * Python
- * Java: Object oriented programming (oop)applications and javafx applications.
- * C++: A powerful and high-performance language used in system and game development.

EDUCATION

Applied Science Private University | 2021-2025

Computer Science

- GPA: Very good
- Recognition for Extended Research Paper

Graduation Project: Empowering IT Students: A Digital Framework for Soft Skills Assessment

Description:

Develop a digital framework to assess and develop the soft skills of IT students, with the aim of enhancing their readiness for the labor market. The system allows students to self-evaluate and track progress in skills such as communication and problem solving

Technologies used: MERN Stack (React.js, Node.js, Express.js, MongoDB).

CERTIFICATES
